

HY-CLAD
SUPERIOR DECKING & RAILING

ADD A LITTLE WOW INTO YOUR LIFESTYLE NOW!

ABOUT HY-CLAD

Established in 1997, HY-CLAD have been manufacturing and installing PVC decking and railing systems to the holiday home and residential markets across the country.

As a family run business, quality of our products and level of service to our customers means everything to us so by working in partnership with park operators over the years we know exactly what our customer requires. By continual reinvestment we strive to exceed our customer expectations for that perfect outdoor solution.

Our decking systems are fabricated in our purpose built workshop, utilising the dedicated PVC cutting, welding and routing machinery. All materials including framework needed for an order are then palletised ready to be installed by our own fitters. With having so much prepared before we arrive means we cause less disruption on site and the job completed a lot quicker.

HY-CLAD
SUPERIOR DECKING & RAILING

A TRULY EXCEPTIONAL OUTDOOR LIFESTYLE

HOLIDAY HOMES

Our stunning PVC Decking Systems give you the perfect outdoor space for your holiday home. A low maintenance product - so you can truly spend your time in the ways that are most valuable to you - to relax and unwind.

Designed not only to perfectly compliment your holiday home's shape and door positions but also for relocation - with the ever changing holiday homes our systems can be altered and extended to suit. Choose from our suggested layouts or have it built to your own design and requirements.

LODGES

With the range - topping lodges and twin units we have the products to match. From our range of foil wrapped profiles to perfectly match your windows and doors or from our selection of glass, there is always a solution to meet your demands. Another option is to have stainless steel posts with glass rather than PVC - the choices are endless.

THE DETAILS MAKE THE DESIGN

SKIRTING

Enhance your holiday home with our attractive PVC skirting system. This PVC system adds the finishing touch to your caravan or holiday home, concealing unsightly waste pipes, and help keep the underside clear from wind blown debris.

Access gates are installed at the appropriate points to get to your services and for storage. Our skirting meets all gas safety regulations. Skirting is available in all of our railing colours. Attached from the inside to ensure an immaculate, fixing FREE finish.

A NEW LEVEL OF LIFESTYLE INSPIRATION

HOME + GARDEN

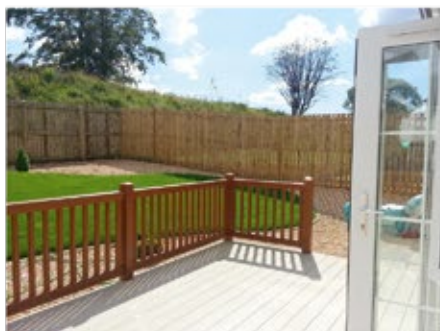

Create the space you desire with our attractive and stylish low maintenance decking systems. With our range of products we have a solution for every garden. Designed to suit any space or an excellent compliment to a conservatory or sun room.

All deck boards are produced with an anti-slip tread for extra safety and an anti-wear finish to ensure durability. With railings and posts from PVC to glass and stainless steel, the choices are endless.

A NEW LEVEL OF LIFESTYLE INSPIRATION

HOME + GARDEN

Spend less time maintaining the garden and more time relaxing in it. An exceptional outdoor area to be enjoyed by all your family and friends, without the demand of annual maintenance.

THE DETAILS MAKE THE DESIGN

STEEL SUB-FRAME

Our galvanised steel sub-frame creates the ideal maintenance free base on which to build your deck. By reinforcing the posts with a twin wall, there is no timber to create a fire risk or to rot in damp conditions - giving your deck long lasting durability.

All framework is designed and fabricated in our workshop so it can be installed on site with the minimum disruption.

DECKBOARD

Fabricated with an attractive, slip resistant embossed wood-grained surface, our PVC deckboard is designed to provide long lasting value and performance.

Each deckboard is slightly domed in the centre to maximize drainage, with the boards carrying a class 1 fire rating. They also have hidden drain holes and feature a tongue and groove design, eliminating the need for fiddly clips. Made from 83% recycled materials, the deckboard has been tested to BS7679 for slip resistance, BS EN660 and BS EN 428 for wear - with the anti-slip surface making them safe in both wet and dry conditions. The deckboards are available in five colours:

cream grey stone brown beige

ADVANTAGES OF PVC DECKING

- superior strength and durability
- low maintenance
- no sanding, painting or staining required
- will not rot, rust, warp or splinter
- strain and scratch resistant
- mould and algae resistant
- 100% lead free
- strain and scratch resistant
- made from eco-friendly 86% recycled PVC
- slip resistant tested to bs7679
- decking load tested to 521kg/m² on a steel sub-frame
- class 1 fire safety rated
- designed to be installed with minimum disruption

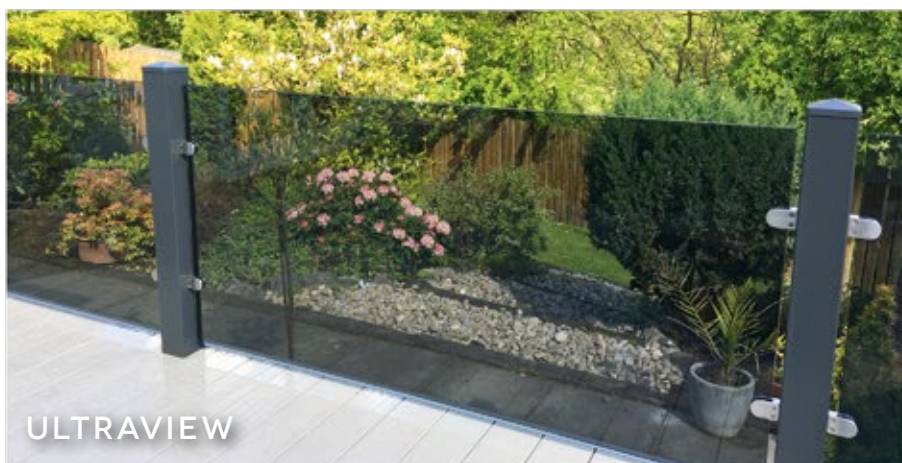

ENGINEERED TO STAND OUT, DESIGNED TO BLEND IN!

RAILINGS

Specifically engineered to be the perfect combination of beauty and brawn, our railing systems are among the most innovative railing products available. To add to the aesthetics, there are no visible fixings - everything is designed to be hidden away. And even the caps and bracket mouldings are foiled for authenticity and quality.

Unlike timber, PVC handrails are maintenance free. No sanding, staining or painting is necessary. Its immaculate appearance is retained with only an occasional clean with warm soapy water and a soft cloth.

The handrail system is available in six colours, including three foiled finishes from stock. Alternative foil finishes are also available and made to order.

beige grey golden oak cream forest green white

To make the most of the views or to restrict wind whilst sitting on your deck, glass can be added instead of the sculptured shaped pickets between the top and bottom rail.

Alternatively, full glass panels can be added either between PVC posts or stainless steel posts to create a spectacular outdoor area. Glass is available in clear, grey, green and bronze tints.

THE DETAILS MAKE THE DESIGN

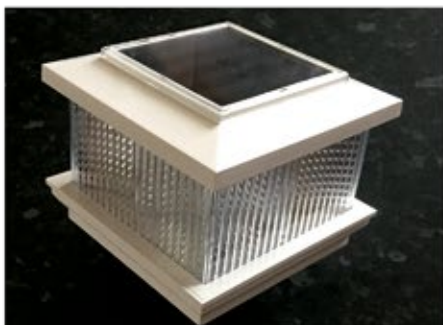

ACCESSOIRES

Making the deck your own, choose from a range of caps and post lights to compliment your deck. Caps are available in four styles, plain, gothic, ball and acorn.

For a perfect match, the post caps are foiled with the same finish as the railing. For that finishing touch, there are three styles of lightning-coach, globe and solar, perfect for those summer nights.

Having a lockable gate fitted creates a safe and secure area for children and pets.

EASY ACCESS FOR MULTIPLE PURPOSES

ACCESS RAMPS

PVC access ramps in various styles and colours can be applied to a range of locations including residential homes, caravans and holiday homes. PVC ramp systems are manufactured and installed to meet all current park regulations.

Suitable for wheelchairs, mobility scooters or alternatively just to provide a convenient, gentle step free access.

FENCING

Our low maintenance fencing is an attractive, high performance and durable surrounding for any property. It is completely weatherproof, will not rot or splinter and can be used in a variety of situations, from gardens to commercial and agricultural applications. Timber and wrought iron can rot and rust, whereas our fencing requires no annual painting or staining, saving time and money for years to come.

We offer a range of fencing in different styles of picket, privacy, ranch and glass. All available in the colours from our railings page.
